

Zoo

Dortmund Zoo is one of the most popular excursion destinations in Dortmund and the region. Since 1953 it has offered a harmonious presence of animals and plants in the beautiful grounds. Dortmund Zoo does not limit itself to putting animals on display, but also provides the necessary animal science information and makes an important contribution to species conservation with its work.

Currently, about 1,500 animals in 220 species live here. The park with its old trees and the various animal houses make a visit to the zoo an experience for the whole family, whatever the weather.

We look forward to seeing you!
