

## Google translator for Chrome

You can read all web pages translated into one of more than 100 languages. Below are the steps you need to follow to use the **Chrome** browser for this.

1. open **Chrome** on your Windows computer.
2. select the three dots for **More** in the top right corner and then select **Settings** from the list
3. select **Languages** on the left-hand side.
4. go to the options for "Google Translator" and activate the option **Use Google Translator** (drag the small button to the right).
5. under "Translate to this language", select your preferred language from the list
6. under "Automatically translate these languages", German must be listed. If German is not yet listed, click on **Add languages** and select German from the list.
7. restart **Chrome** to apply the changes.

Now you can read all websites in your desired language and even fill out and submit the online forms of the city of Krefeld in your desired language.
