This link will take you to the BIWENAV: [BIWENAV Kreis Recklinghausen](#)

There are the following types of vocational colleges:

Training preparation at vocational colleges

Vocational schools have programmes for pupils **with or without a secondary school leaving certificate**. You have not yet received a contract for an apprenticeship? You don't yet have a concrete idea of where you want to work? Here you can gain insights into various professional fields. You can build on your secondary school leaving certificate. Or you can obtain your secondary school leaving certificate.

Berufsschule:

Here, training takes place in a **dual system**. You will learn part of your training at school. The other part you learn in a company.

Berufsfachschule:

In Berufsfachschulen you can prepare yourself for the job. The courses last 1 to 3 years. You need at least one **Hauptschulabschluss**. They receive basic vocational training, vocational preparation or even a vocational qualification.

Do you already have a school-leaving qualification? Then you can complete the next degree here.

The Berufsfachschulen are generally divided into the following occupational fields:

- Economy and administration
- Health, education and social affairs
- Technology and natural sciences

Fachschule:

You can **continue your professional training** at a technical college. The courses usually last one to two years.

Do you already have vocational training? Have you already worked?

These courses expand your knowledge. They are intended to deepen the content learnt. After the courses, you can work in middle management or start your own business.

The Fachschulen are also divided into the following specialist areas:

- Technology
- Economy
- Social services
- Agriculture
- Design

Fachoberschule:

Have you already completed an apprenticeship? Do you have a secondary school leaving certificate? Then you can go to a specialised secondary school. You go there for two years. This school prepares you for the **allgemeine Hochschulreife** for the You will need to learn a second foreign language. Without a foreign language, you will receive a subject-specific higher education entrance qualification. This means that you are only allowed to study certain subjects.

The Fachoberschule are available in the following orientations:

- Technology
- Economy
- Health and social affairs

Berufliches Gymnasium:

Would you like to study at a university? Then you need the Abitur. You can catch up on your Abitur at a vocational grammar school. You will need an intermediate level of education. Your average grade must be 3.0 or better. You can then go to a vocational grammar school for three years. After the three years, you will graduate from high school. It is also divided into corresponding specialisations:

- Technical direction
- Economic direction
- Social services and healthcare
- Agricultural science direction
- Biotechnological direction
- Nutritional sciences
